

解釋名詞共 25 題，每題 4%。請依序作答，未作答者請抄題號並留空白行。

1. Gap junction
2. Kinetochore
3. Chemiosmosis
4. Cell-cycle clock
5. Operon
6. Post-transcriptional control of eukaryotic gene expression
7. Motor unit
8. Leptin
9. Bohr shift (or Bohr effect)
10. Sensory transduction of a rod cell
11. Hormonal control of human gametogenesis
12. Osmoregulation in a saltwater fish
13. Cell-mediated immune response
14. Descent with modification
15. The smallest unit of evolution
16. The biological species concept
17. The polymerase chain reaction
18. Mendel traits in genetics
19. Mass extinction
20. The tree of life
21. Alternation of generation
22. Deuterostome development
23. Molluscs
24. The logistic growth model
25. Ecosystem
