Would fans lay down their lives for football? Bill Shankly, the legendary football player and Liverpool

接次頁

manager, once famously said he was "disappointed" with the idea that the sport was a matter of life and death. "I can _____ you," he said, "it is much, much more important than that."

It was a Scotsman's dry wit, meant to both mock and at the same time recognize the passionate tribalism—for the club, for the national side—of many fans. If policy makers and commentators think tribalism is over, the millions—billions—of members of the huge world football community know it is not. For them, group identity is the stuff, and the staff, of life. And in the nearly 60 years since Shankly cracked the joke, it has only become more intense.

Tribalism, writes the Yale law professor Amy Chua, is grossly underrated in politics and international affairs. Analysts and politicians overlook the fact that, in many places, "the identities that matter most—the ones people will lay down their lives for—are not national but ethnic, regional, religious, sectarian, or clan-based."

The World Cup is now being played across Russia's vast expanse, and already we know who will stay in for the second round, who will go. Germany is out. England, where the game was invented, has had a mostly thin time since beating West Germany, in 1966—for its only tournament win—so far. This time, however, it has remained in.
