

第一大題 1-7，單選，每一小題2分，請將答案填寫於答案卷第一頁【選擇題作答區】內

1. It will take how many weeks for soft tissue to cover completely the socket after tooth extraction ?
(A) 2-3
(B) 4-8
(C) 9-12
(D) 13-16
2. Which procedure would cause tooth mobility increasing temporarily?
(A) scaling and root planing .
(B) gingival curettage
(C) mucogingival surgery
(D) pocket reduction surgery
3. If a tooth with PD (probing depth) ≤ 3 mm is treated with periodontal surgery that will result in:
(A) CAL (clinical attachment level) gain.
(B) CAL loss
(C) reduced PD
(D) increased PD
4. In the experimental gingivitis study by Loe et al. (1965), when would most participants have resolution of clinical signs of gingival inflammation after resuming oral hygiene ?
(A) 1 day
(B) 3 days
(C) 5 days
(D) 7 days
5. According to Lang et al. (1973), the longest interval between effective oral hygiene procedures and maintenance of gingival health could be how long?
(A) 12 hours
(B) 24 hours
(C) 48 hours
(D) 72 hours
6. Which one of the following type of periodontal diseases is described as having a non-contributory medical history, familial aggregation, and rapid attachment loss and bone destruction?
(A) Chronic periodontitis
(B) Aggressive periodontitis
(C) Necrotizing periodontal disease
(D) Periodontitis associated with systemic disease
7. If the frequency of peri-implant diseases is calculated upon implants number rather than subjects number, it will be ?
(A) underestimated
(B) equally predictive
(C) overestimated
(D) inconsistent

第二大題 問答題：

8. Describe the agents/instruments used recently which can adjunct effectively to help scaling/root planing procedure during treating chronic periodontitis. (15%)
9. Please compare the treatment effects (PD and BOP) of phase I therapy between older patients and younger ones. (15%)
10. For interdental plaque removal in patient with chronic periodontitis, please compare the effectiveness between interdental brush and dental floss (3%), and explain why ?(15%)
11. For debridement of the class II and III furcation lesions, please compare the effectiveness between ultrasonic instrument and periodontal curette (3%), and explain why ? (15%)
12. How to do the maintenance care for a dental implant ?(20%)
